

Choke & Kill and Well Service Hoses with TauroFlon™ liner

High quality flexible hose assemblies licensed under API 16C 2nd Edition - FSL3

ContiTech is now offering API 16C hoses with the patented TauroFlon™ liner, giving exceptional chemical compatibility in high pressure, high temperature environments.

ContiTech's TauroFlon™ lined hoses are suitable for conditions up to 15,000psi and 130°C. Made to a robust standard, the hoses are fitted with an internal stainless steel carcass, designed to withstand periods of continuous operation where there is a high risk of rapid decompression. The liner is resistant to a wide range of chemicals at high temperatures (see table for reference).

TauroFlon™ lined hoses are manufactured at the ContiTech plant in Hungary and have passed the stringent mechanical and high temperature exposure tests required by API 16C, as witnessed and certified by DNV.

Recommended applications:

- Choke & Kill Lines
- Well Testing
- Well Completion
- Well Stimulation/Acidizing
- Chemical Injection

Chemical Compatibility	
Medium	TauroFlon™
Crude oil	130°C
Water based mud	130°C
Oil based mud	130°C
Hydrogen sulphide (< 20%)	130°C
Zinc bromide (40 %)	130°C
Zinc bromide (saturated)	130°C
Calcium bromide (25 %)	130°C
Calcium bromide (saturated)	130°C
Cesium formate (saturated)	130°C
Potassium formate (75 %)	130°C
Hydrochloric acid (15 %)	130°C
Hydrochloric acid (37 %)	130°C
Hydrofluoric acid (3 %)	130°C
Hydrofluoric acid (10 %)	130°C
Produced water	130°C

Choke & Kill and Well Service Hoses

with TauroFlon™ liner (130°C)

Standard

API Spec. 16C up to FSL 3

Construction

Bore type	full flow, rough bore
Liner material	H ₂ S resistant TauroFlon™
Operating temperature	-20°C to +130°C (0°F to 266°F)
Survival temperature	177°C (350°F) for at least 1 hour
Max. available lenght	60m (200ft)

Features & Comments

- Outstanding chemical compatibility and temperature resistance
- Suitable for Chemical Injection
- Coupling materials meet NACE MR 01-75 / ISO 15156 latest edition
- See Flexible TauroFit Choke & Kill Lines for subsea BOPs and for Flexible Choke & Kill Lines with extremely small MBRs
