

AOS Offshore

Electrical Solutions & Services

Precision · Punctuality · Quality

AOS
OFFSHORE

About

AOS Offshore

AOS Offshore was originally founded to service the needs of the offshore energy sector. Its highly experienced Electrical Engineers and Consultants are now able to provide a full range of electrical services for not just the offshore, but also the commercial and residential sectors as well.

Our success is founded upon market leading training and the timely delivery of projects to our clients' complete satisfaction. Our attention to detail, project management and expert knowledge sets AOS apart from its regional competitors.

AOS has the resources, competence and experience to help its clients achieve operational efficiency in their energy and sustainability initiatives.

Proactive Project Management (Time, Budget & Work Scope)

Focus on work site Health & Safety

100% Customer Satisfaction

Our Aim

AOS strives for one outcome – total client satisfaction. That satisfaction comes from our focus on timely delivery, value for money, work-place safety and completion of work scope. AOS can plan, resource and undertake the most complicated electrical projects that you need, across High, Low and Extra Low Voltage Electrical Systems.

Our Safety Statement

AOS is justifiably proud of its commitment to Health & Safety, not just for its team but also the Environment. We are BizSafe Star and ISO (9001,14001 & 45001) accredited.

Our Team

**Jason
Ang**

Jason, our partner from Singapore Innovation Technology Pte Ltd, graduated in Degree of Electrical and Electronic Engineering Specializing in offshore and commercial engineering & technical services including project management, consultation, manpower supply, inspection, mechanical & electrical works, commissioning, and offshore downtime equipment troubleshooting. Street Lighting Installation

Internal Building Telephone System

Eco Power/Energy Saving System

Lighting Specialist Solution

ELV (Extra Low Voltage) System

- Building Management System Sound

- Reinforcement System Public Address System

- CCTV, Card Access System (Security System)

- Digital Calling / Paging System LED & Information Display

- System Audio Visual System

- Stage Lighting & Stage Curtain System

- Fireman Intercom System

- Video Conference System

- ICT & Networking System Telecommunication System

- (PABX/Keyphone)

Switchboard Retrofit and Upgrade

We partner with regional electrical manufacturers to bring the latest proven technology to the marketplace; so our customers can be assured of the best in technology for their upgrade or construction projects. This allows our customer's needs to be integrated into the design and specifications for equipment like LV Switchgear, Generator Controls, Various Motor Controls (Starters, VFD's, Soft starters) and Control Panels.

Maintenance & Facility Management Services

AOS is a multi-discipline engineering company, capable of providing comprehensive M&E operations and maintenance services across all engineering disciplines. We can deliver scheduled preventive maintenance services, repair works, annual shutdowns or full facilities management services. AOS are fully qualified to maintain equipment in Hazardous Environments.

A&A and Fit-out

AOS has worked, for many years, on an array of A&A and fit-out projects. We understand the complexities and challenges faced when the building status remains live as the construction takes place. We cover projects of all sizes ranging from tenancy fit-out to additions and alternations works for existing buildings.
